Education

JIMS Engineering Management Technical Campus
Bachelor of Technology in Computer Science, CGPA: 7.79/10

Nov 2022 – Aug 2026
Greater Noida, Uttar Pradesh

Work Experience

Interra IT

Jan 2026 – Present

Java Developer trainee

Noida, India

- Designed and developed a full-stack Vehicle Registration and Service Management System using Java, Spring MVC, JSP, Servlets, and MySQL, following Agile SDLC practices; delivered distinct dealer and customer portals with role-based authentication
- Engineered a VIN-based service booking dashboard for Oil Change, Full Service, Wheel Alignment, and Maintenance, reducing average booking time through applied frontend optimizations and efficient backend queries (validated in internal testing)
- Implemented RBAC and 2FA authentication using Spring Security with full REST API development; led Maven build system migration resulting in faster CI/CD pipelines and improved dependency management

Projects

BoostCV: AI-Powered Resume Analyzer | *Spring Boot, React, LLaMA, JWT, Maven*

[Live Link](#)

- Built an end-to-end AI-powered SaaS platform using Spring Boot that analyzes resumes for ATS compatibility and delivers personalized optimization insights
- Integrated the Llama model for job-specific resume customization, boosting keyword match rate and role relevance by 30%
- Achieved 90% test coverage using JUnit and Mockito and reduced analysis time by 40% through automated Maven CI/CD pipeline

CodeQuest | *TypeScript, Next.js, Firebase, WebSockets, Gemini API*

[Live Link](#)

- Architected a real-time coding battle platform enabling live coding challenges against AI and peers using WebSockets for seamless synchronization
- Integrated Gemini API to deliver real-time code hints and debugging suggestions, enhancing user experience
- Engineered a system to handle multiple concurrent sessions, reducing average response latency by 25% through targeted performance optimizations

Skills

Languages: Java, Python, TypeScript, JavaScript

Backend Frameworks: Spring Boot, Spring MVC, Hibernate/JPA, Microservices, Rest APIs, JWT

Frontend: React.js, Next.js, Tailwind CSS

Databases: PostgreSQL, MongoDB, SQL

Cloud & DevOps: AWS, Docker, Kubernetes, Maven, Jenkins, Git, CI/CD

Testing & Methodologies: JUnit, Mockito, WebSockets, Agile/Scrum

Achievements

Google Code-In Finalist – Open Source Contributor, OpenWISP

Oct 2018 – Dec 2018

- Improved test coverage by 40% across openwisp-radius, django-x509, and django-freeradius, applying software quality best practices.
- Strengthened token-based authentication in django-freeradius, reducing security vulnerabilities by 35%

Google Code-In 2019 – Open Source Contributor, TensorFlow

Nov 2019 – Dec 2019

- Added validation steps to the Food101 dataset and expanded Imagenette dataset in TensorFlow Datasets, improving data consistency by 28%
- Built a supervised ML model for diabetes prediction achieving 91% accuracy by demonstrating applied Data and Analytics skills.
